Development of a prototype for a social network for travelers. This prototype was developed for a start up company located in Boston, USA.

Technology: LAMP (Linux, Apache, MySQL, PHP), server administration.

### **Vivocom**

Oct 2010 - Dic 2010

Development of the first prototype of the web platform that some months later opened online under the name of Koowall. This web site was developed in PHP and it needed much implementation of Javascript pseudo classes and an intensive work with AJAX.

### **Smarter Travel Media** (Charlestown, MA - USA)

Mar 2009- Nov 2009

Development of the web site [www.bookingbuddy.com](http://www.bookingbuddy.com) using PHP, Javascript, CSS, AJAX, Linux, Subversion. I got some experience with Symphony and with Offermatica tools.

### **Web Developer as a Freelancer** (Cambridge, MA - US)

2007- Present

<http://www.clandestino.us> - This web page is made with Flash and ActionScript. Its look is based in windows that can be dragged over the background. Photos, videos and music are loaded dynamically when the web page starts. The client can add new contents to the web page by uploading the files to the server.

<http://reyesformayor.com> - This web page was designed by EME Graphics and I developed the code to convert the images in a web page. This web site was developed with PHP, Javascript and CSS and has one photo gallery. The web site was developed for a mayor campaign and it is currently expired.

<http://www.travelandnaturephoto.com> - This is the web site for a professional photographer specializing in travel and nature photos. The page was developed with PHP. The photos are loaded dynamically from the file system.

<http://clandestino.rfraile.net> - This was my first web page developed as a freelance. It was developed in Flash and has music, photos and videos. This web page has been replaced by a new one that I also have developed, but you can see the older version that is hosted in my server.
